Public Auction

Property Address: 185 Bokum Road, Old Saybrook, CT 06475

Anyone who would like to participate in the auction must register with the auctioneer prior to the auction and present for the auctioneer's examination a certified or bank check made payable to the Town of Old Saybrook in the amount of \$22,000. The Town reserves the right to accept or reject any and all bids at auction.

Qualified bidders will be issued numbers and bidding will be conducted and recorded by those numbers. The auctioneer must collect all deposit checks from bidders when bidders register to bid. The successful bidder will be required to endorse the check to the Town of Old Saybrook. The successful bidder must be prepared to execute a contract with the Town immediately upon completion of the bidding process with the Town of Old Saybrook. This contract will require that the balance of the purchase price and the closing of the transaction shall take place within 30 days following the approval of the sale by the Town. A copy of the contract will be available for review by bidders at 10:00 a.m. on the day of sale."The deposit may be forfeited if the successful bidder fails to complete the transaction within the thirty-day period.

The property is being sold "as is", subject to no contingencies whatsoever. The auctioneer and the Town of Old Saybrook make no representations or warranties, either express or implied, concerning the property's condition, and no adjustments will be made for any defects that may be discovered after this date. The auctioneer and the Town of Old Saybrook make no representations of any kind as to the environmental condition of the property. All bids are to be based on bidder's own information and knowledge of the property, learned through his or her own efforts, and not on any representation or comments made by the auctioneer.

The property is being sold subject to:

All taxes due the municipality,

All building and zoning regulations of the municipality which affect this property,

All building lines, easements, restrictions and all other matters concerning this property which appear of record,

The rights of any person in possession or occupancy of the property,

The right of the United States of America to redeem the property, if applicable under Federal law and

Any other liens on the property.

Auctioneer: Attorney Michael E. Cronin, Jr., 201 Main Street, Old Saybrook, CT 860-388-5729

Hypothetical Conditions/Highest and Best Use Comments

There is a 480 sf addition attached to that was being used as an accessory apt. The town records do not reflect conversion of part of the garage to living area (~288 sf) and it is assumed to have been done without proper permits. Inspection reveals that this area has not been occupied for several years and has fallen in to disrepair. The quality of construction is poor. There is evidence of water damage from burst pipes and a mold like substance was observed throughout. The cost to remedy the defects is unknown. The legality of the conversion is unknown. Therefore, the highest and best use is considered to be as a single family home without the accessory apt. This appraisal is made based on the hypothetical condition that the accessory apartment does not exist and that the garage has been converted back to two bays.

SALES COMPARISON APPROACH additional comments

Value is estimated as of 09/22/2016 that is the effective date of this appraisal. Property was inspected on 09/22/2016. Date of report is 10/10/2016.

In order to estimate the current market value of the subject property, research of comparable property sales was conducted using the local mls and land records, research focused on properties comparable in utility, location, style, size and effective age and overall market appeal. All transfers are closed sales, unless noted otherwise, and represent the most recent and similar

After selecting the sales, a comparative analysis of relevant factors that influence value was undertaken to adjust the sales to the subject property based upon the actions and preferences demonstrated by the participants in the marketplace.

Comparable sales were selected based on physical and location characteristics. Of these sales, those considered to be most similar were used in the sales comparison approach because of similar utility,age, square footage and location.

Information, estimates and opinions furnished to the appraiser and contained in this report were obtained from sources considered reliable and believed to be true and correct. However, the appraiser can assume no responsibility for the accuracy of such items furnished to the appraiser.

Market grid adjustments have been derived from an analysis of past sales data from the subject's market neighborhood. Information sources include public records, exterior inspections, mls data and/or appraiser files.

Land value estimate is derived from analysis of recent land sales and sales of improved properties with abstraction of site value estimate based on depreciated value of improvements. The cost approach was not deemed necessary for credible assignment results for this intended use, specifically due to lack of recent land sales to develop a reliable site value estimate, therefore it is not developed.

The subject is a single family residence located in a predominantly owner occupied area. The lack of rental data and the lack of sales of rented dwellings make meaningful rental and gross rent multiplier conclusions impossible, therefore the income approach was not applied.

SCOPE OF WORK

The purpose of this appraisal is to estimate the fair market value to assist the client with a market value estimate for marketing purposes.

This appraisal has been prepared as a summary appraisal report as defined by the appraisal standards board of the Appraisal Foundation and is in conformance with the competency provision of the uniform standards of professional appraisal practice This appraisal report in intended to comply with the reporting requirements set forth under Standards Rule 2-2(b) of the Uniform Standards of Professional Appraisal practice. As such, it presents only summary discussions of the data, reasoning, and analyses that were used in the appraisal process to develop the appraiser's opinion of value. Supporting documentation that is not provided with the report concerning the data, reasoning, and analyses is retained in the appraiser's file. The depth of discussion contained in this report is specific to the needs of the client and for the intended use stated in this report.

The source for the definition of market value is taken from the Federal Registrar 12CFR 34, 42 dated 08/24/90.

Intended User

The intended use of this report is to assist the referenced client in evaluating the subject property for purposes described in this report. The function of this appraisal is to assist the client with a market value estimate for marketing purposes. Intended use and intended users are described in the body of the appraisal report. Intended user(s) are named at the time of assignment engagement. Client may choose to distribute copies of this report to other parties however they are not intended users unless named as such at time of engagement. Use of this appraisal and appraisal report by another user is not intended by the appraiser. The appraiser in this assignment cannot accept responsibility for uses not otherwise identified at the time of

This report is intended to be used for marketing purposes only and is not intended to be used for mortgage lending or any other purpose. This report is not transferable per USPAP guidelines.

The appraiser is not responsible for unauthorized use of this report.

Inspection disclosure

The Appraiser is not a home or environmental inspector and this appraisal report is not a home inspection or environmental inspection report. The Appraiser does not guarantee that the Property is free from defects. The appraisal establishes the value of the property for the purpose stated in this report only. Potential buyers need to secure their own home inspections through the services of qualified inspector(s) and satisfy themselves about the condition of the property.

Complete visual inspection of the interior areas of the subject property: A visual observation from standing height of the accessible areas and unobstructed, exposed, surfaces of the living area without removal of personal possessions. It includes the visual observation of attached automobile storage, if any, as well as of any attached accessory buildings judged by the appraiser to have contributory value.

Complete visual inspection of the exterior of the subject property: A visual observation of the unobstructed, exposed, and accessible perimeter of the residential improvements from standing height. It includes the visual observation of detached automobile storage, if any, as well as of any detached accessory buildings judged by the appraiser to have contributory value.

Areas of limited access (i. e. attic, crawl spaces, eaves, etc.) may not necessarily be inspected due to limited access. For purposes of this appraisal, a condition for any such applicable area is determined after a visual inspection of related/adjoining parts of the structure. An appraiser is a trained and experienced observer of real estate, but recognizing, detecting, or measuring contamination is often beyond the scope of the appraiser's expertise. Remediation and compliance cost estimation involves knowledge and experience beyond that of most appraisers.

This inspection is not intended to serve as a termite inspection, although any problems observed are noted in the appraisal. The client should contact a qualified inspection professional for this service if so desired

The appraiser is not a home or environmental inspector. The appraiser provides an opinion of value. The appraisal does not guarantee that the property is free of defects or environmental problems. The appraiser performs an inspection of visible and accessible areas only. Defects may be present in areas the appraiser cannot see. A professional home inspection and/or environmental inspection is recommended.

No items of personal property are included in the appraised value of the subject.

Septic system disclaimer

At the time of inspection, no seepage or odor was noted from the ground. Appraiser is not responsible for testing the septic system, including the leaching fields.

Well water disclaimer

Appraiser was not responsible for testing the flow, volume, and/or quality of the water.

Living area is defined as legal, finished, permanently heated, living space contiguous with other living area and regarded by a typical purchaser as being habitable and as having utility. At the appraiser's sole discretion based on inspection of the property, any below grade or partially below grade finished areas may or may not be included in the living area of the subject property. The visual observation of the attic, the crawl space, any unfinished basement, and below grade storage is based on HUD's head and shoulders" requirement. This appraisal report conforms to The American National Standards Institute ANSI Z765" -2003, approved November 2003.

Adverse Environmental Conditions

The existence of any Hazardous material, including but not limited to, Urea formaldehyde foam insulation, radon gas, asbestos products, lead based paints or toxic waste contaminant, which may or may not be present in the subject improvements, on the site or in the immediate vicinity of the subject has not been observed by the appraiser. The appraiser has no knowledge of nor is responsible for testing for the existence of such hazardous material in or on the property. If the client has a concern then qualified expert(s) should be contacted.

Lead Based Paint Disclosure/Disclaimer

The subject property was built prior to January 1, 1978. Residential structures built prior to 1978 may contain lead based paint. If the client has a concern, appraiser recommends consulting a licensed professional for advice. Appraiser is not responsible for testing to determine if the paint surfaces in/on the subject property are indeed lead-based.

Computer signature

The signature on this report may be computer generated, but should be considered an original signature. Access to the date entered in this report is not allowed after the appraiser "signs" this report. Any changes must be made through the appraiser.

Digital pictures

The subject pictures in this report are taken with a digital camera, unless otherwise indicated. They are the original pictures and are not altered by the appraiser in any way.

Some comp photos may be taken from mls, appraiser's files and/or town records. If so, then appraiser certifies that an exterior inspection of the comparable sale has been performed from the street.

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

Definitions & Scope of Work

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised and acting in what they consider their own best interests;
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
- * This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), and the Office of Comptroller of the Currency (OCC). This definition is also referenced in regulations jointly published by the OCC, OTS, FRS, and FDIC on June 7, 1994, and in the Interagency Appraisal and Evaluation Guidelines, dated October 27, 1994.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by

the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.

- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.
- I did not base, either partially or completely, my analysis and/or the opinion of value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property, or of the present owners or occupants of the properties in the vicinity of the subject property.
- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.
- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification.
