ACKNOWLEDGEMENTS

This survey was made possible with financial assistance to the Connecticut River Estuary Regional Planning Agency from the Heritage Conservation and Recreation Service of the U. S. Department of the Interior and the U. S. Department of Housing and Urban Development through grants administered by the Connecticut Historic Commission and the Connecticut Office of Policy and Management.

The Connecticut River Estuary Regional Planning Agency wishes to express its appreciation to all those who participated in this monumental endeavor to preserve a pictorial record of the Region's architectural and historic heritage for future generations. It could never have been accomplished without the generous assistance of numerous individuals from local organizations in the nine towns who volunteered many hours of their time in pursuit of the information contained herein and the dedicated perseverance of Liz Hancock, Chris Lundberg and Jerry Scott of the RPA staff in bringing it all together from the nine corners of the Region.
OLD SAYBROOK, MOTHER OF THE SHORE-RIVER COMMUNITY

Old Saybrook, founded in 1635, is one of the earliest settlements in Connecticut and, indeed, the United States. Its strategic location at the mouth of the Connecticut River, bordered by the Long Island Sound, early attracted Dutch explorers who established a trading post at Saybrook Point nearby the present Terra Mar Hotel.

In 1620 a syndicate of English nobles formed the Plymouth Council to exploit a royal grant conferred upon them by King James I for the colonization of New England. The Council was responsible for the emigration of the Mayflower pilgrims to America and the subsequent founding of the Massachusetts Bay Colony. Gratified by the initial efforts at overseas colonization, King James issued another patent in the way of a personal grant of land to the Earl of Warwick.

After the death of James I his throne passed to his son Charles I who ruled as an absolute despot. Englishmen who were sympathetic to Puritan Protestantism and who supported the Parliamentary cause were particular objects of the monarch's wrath. Among these were the Earl of Warwick, Viscount Saye and Sele, Lord Brooke, and Oliver Cromwell. As relations worsened it became increasingly necessary for these opposing forces to secure their safety. During a clandestine meeting at Saye and Sele's castle, it was proposed that Warwick's holdings in Connecticut be colonized as a refuge for this endangered aristocracy. Under the leadership of Warwick, Saye and Sele, and Brooke, therefore, the Saybrook Company was formed.

One of the first acts of the company was to commission John Winthrop, son of the Massachusetts Bay Colony Governor, to govern the settlement for a period of one year. With approximately twenty men, carpenters and laborers, Winthrop set off for the Saybrook Point site initially occupied by the Dutch traders. The crew unloaded from their vessel tools, supplies and two deck cannons with which to thwart the return of the Dutch. It is said that two salvos from the English cannons at Saybrook Point discouraged the approach of the first returning Dutch vessels. Following that Saybrook was formally proclaimed a British colony.

In 1636 "Winthrop's Twenty" was joined by Lieutenant Lion Gardiner, the first commander of Saybrooke Forte. A civil engineer, experienced in fortifying camps and cities, he was hired by the English settlers to "assist them in the drawing and making of a city, town, or fort of defense". A statue of Gardiner can today be seen at the foot of College Street overlooking the Sound.

The Saybrooke Forte was completed in 1636 and marked the actual birth of the Saybrook Colony. The first organized religious services in Connecticut were conducted in its Great Hall and continued there until 1647 when the forte was destroyed by fire.
The first years of the settlement were chaotic. A changing political climate in England forestalled the emigration of the original lords and gentlemen who had planned the colony. John Winthrop did not renew his commission as Governor and his authority passed to George Fenwick, the only one of the original patentees who came to Saybrook. The fort was also the scene of several skirmishes during the Pequot War. In 1637 Lion Gardiner wrote of the besieged fort "with but twenty-four in all, men, women, and children, there is not enough food for two months lest the corn crops be saved". Though some died, the crops were saved and the Pequots were eventually turned back for good.

In 1644 George Fenwick, succumbing to the rigors of frontier life, returned to England and ceded Saybrook to the Connecticut Colony. Shortly thereafter, a committee was established to study the outlands and to make recommendations for further land division. The first quarter was in the vicinity of Oyster River. The second quarter, known as the Eight Mile Meadow, was in the vicinity of present-day Essex, and the third quarter was on the east side of the river, which subsequently became the colony of Lyme.

Old records indicate that there were approximately fifty taxable persons in the colony in the 1650's but the population of the original settlement was greatly reduced in the year 1660 by the removal of a large number of the inhabitants, under the leadership of the minister and the town clerk of Saybrook, to found the Town of Norwich. It was in the same decade that a group of thirty families proceeded westward to establish themselves at a new plantation on the Indian River to be known as Hammonasset, later named Killingworth.

Expansion to the east bank of the river occurred very soon after the first settlement at Saybrook Point. Matthew Griswold had been given land on the east side of the river by his friend, George Fenwick, before Fenwick returned to England in the 1640's. By the time Lyme was set apart from Saybrook by the "Loving Parting Agreement" in 1665 as East Saybrook there were some thirty proprietors of record with holdings on the east bank. Authorization to create the new settlement had been given by the General Court two years prior to that in 1663. In 1666 the first congregation was organized in Lyme under the leadership of the Rev. Moses Noyes and the town was officially named in 1667. It was given the name of Lyme and originally included some eighty square miles of territory. Parts of Hadlyme and the southern part of Salem, as well as of Lyme, Old Lyme and East Lyme were included.

As the population grew and spread into the hinterlands it became necessary to establish new congregations, since the distances were great and travel difficult. The settlers in the Eight Mile Quarter were granted permission to establish the Second Society in 1722 and in 1724, the Third or West Society was established in what is now the Town of Westbrook. By 1740 a Fourth Society was established in the northern part of the Eight Mile Quarter, now Chester. A similar process of division took place on the east bank in the Lyme Plantation.

The Church and State were one in early Connecticut. There were some twenty churches established by 1670, and the need for training ministers to serve
these congregations became increasingly apparent. After considerable debate it was determined that a collegiate school should be established in Saybrook. Classes began in the year 1701 in Killingworth, whose pastor, the Rev. Abraham Pierson, had been named the first president of the school. Early dissatisfaction of the student body with the quarters in Saybrook and the division of opinion that had never been completely resolved as to the desirable location of the school resulted in its removal to New Haven in 1718, where it was renamed Yale College in honor of a major benefactor, Elihu Yale. It is very probable that the original college building in Saybrook that was purchased from Nathaniel Lynde in 1708 was the same "great hall" referred to by Gardiner as the house of George Fenwick.

It was here in 1708 that the Saybrook Platform was drawn up which fixed Congregationalism as the established church in Connecticut by official act. The Synod consisted of twelve ministers and four laymen representing some forty-one independent congregations then in existence. The platform which was drawn up at this Synod was printed at New London in 1710, the first document to be printed in Connecticut.

The final partitioning of the Saybrook Colony into the political units which we know today occurred within a twenty year period in the nineteenth century. Chester became a separate town in 1836 and Westbrook in 1840. Two years before that, in 1838, Killingworth was divided into two parts, the northern section retaining the name and the southern portion, containing the original settlement, becoming Clinton. What remained of Saybrook was further divided in 1852 when Old Saybrook was separated. This included the Borough of Essex but two years later Essex, itself, became a separate town. The following year Lyme was subdivided into Lyme and South Lyme, which changed its name two years later to Old Lyme. The remainder of the original town of Saybrook changed its name to Deep River in 1947.

Old Saybrook shares with those shore-river towns which it spawned an illustrious maritime history. Shipbuilding was a thriving industry well into the mid-nineteenth century. Its development in town paved the way for an extremely profitable West Indies trade. Every piece of land along the river bank hummed with shipbuilding activity during those days.

Long after the passing of the shipbuilding era Old Saybrook's destiny remains linked to the sea. Its enviable location at the mouth of the Connecticut River and on the Long Island Sound has made it a mecca for water sports enthusiasts. Over the years it has become a widely known summer resort with countless hotels, inns, restaurants, and shops to accommodate seasonal crowds. Its population of close to 10,000 is regularly doubled during the summer months.

Old Saybrook today retains many of the natural attributes which early attracted English settlers and which continue to draw countless
visitors. Its combination of ageless colonial charm and modern community living within a setting of outstanding natural beauty has made it one of the most desirable locations in the region. Old Saybrook is more than just living space however. It is an important repository of the state's history. It is this aspect more than any other which makes it a special place. The "Keystone of Connecticut History", as Saybrooke Forte has often been termed, is an apt description of Old Saybrook as well. This is, indeed, where it all began.

HISTORIC SURVEY METHODOLOGY

for the

CONNECTICUT RIVER ESTUARY REGION

The survey was a cooperative venture of the Connecticut River Estuary Regional Planning Agency and local historical societies or other organizations, who provided both advisory and volunteer assistance during the course of the project. Nine town surveys were undertaken by the RPA as an areawide project.

The procedure employed was first to identify and enlist the aid of those groups and individuals in town having a particular interest in the town's history. Through the local news media and through local representatives on the Regional Planning Agency's board of directors, the survey plans were introduced to the townspeople. The probable benefits of the study to each community were outlined and the support of the towns' residents was invited.

An exploration of available publications relating to local history and of previously undertaken historic and architectural surveys enabled the Agency's staff to identify places of known importance and lay out tentative routes. The area was then divided into workable districts and maps were drawn up accordingly.

This initial preparation completed, the survey teams obtained clearance from appropriate local officials and embarked on its field research. They worked in teams of two and shared the responsibilities of compiling the information and keeping a photographic record of sites included. In most cases information regarding significant sites was obtained by interviewing owners and occupants. Town records, publications, and knowledgeable residents were also consulted.

Properties reviewed were diverse in nature. Sites and structures having industrial, agricultural, religious, military, and commemorative importance were variously recorded. Contemporary as well as early examples of architectural style have been included. Examples of seventeenth to early twentieth century domestic architecture clearly predominate.

The survey teams were careful to include not only those properties of unquestionable significance but also those showing reasonable potential and whose final assessment could better be made by a more highly trained eye, i.e. the survey is more inclusive than exclusive. As such, this document represents the most comprehensive pictorial inventory to date of the towns' significant architectural and historic sites of all eras and will be a valuable informational resource to future historians of the local scene.

The reader is directed to two historic district reports on file with the Connecticut Historic Commission for historic and architectural information regarding Old Saybrook Point and Fenwick Borough. Both areas were proposed for historic district designation in the early nineteen-seventies. The property owners on Saybrook Point rejected the proposal but Fenwick subsequently became the second historic district in the Estuary Region.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This gable roofed structure has a very wide roof overhang all around. The main gables feature a row of three round headed attic windows and the window casings are somewhat unusual.

The interior features wainscoting, old wooden benches, paneled doors with finely molded casings, large 6/6 light windows, ticket windows with metal bars, and old cast iron radiators. The original wooden floor was covered with vinal tiles by Amtrack.

SIGNIFICANCE

Architect: ____________________ Builder: ____________________

18. HISTORICAL OR ARCHITECTURAL IMPORTANCE:

Last manual switch tower of its type along the coast – c.1910.

A committee was formed, and a proposal was prepared by the RPA Feb. 21, 1975. The station since has been scraped and painted by volunteers, and Amtrack has upgraded plumbing, fixed the roof and laid tile on the floor.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This large gambrel roofed house has many classic features. One gambrel roofed wing projects toward the road featuring a Palladian style window with Victorian features. Two adjoining dormers on the main roof have very decorative cornices and divided light windows. The main entablature of the house is denticulated and there is a decorative Victorian window over the front door. There is a shed roofed porch on the front running the length of the house.

SIGNIFICANCE

Architect: Builder: Gad Baldwin

18. HISTORICAL OR ARCHITECTURAL IMPORTANCE:

This house was built by Gad Baldwin in about 1888 on land which had been owned by Capt. EE. Morgan before a mortgage foreclosure which transferred the title to Edwin and Cynthia Marvin. The Marvins sold the land to Gad Baldwin.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This building has a long gable roofed facade with the center portion over the entrance fully pedimented. The entire entablature including the pediment is denticulated, and within the pediment is an octagonal divided light window. The front door has double entry doors with a large fanlight window over it. The doors are flanked by half round columns supporting a large scrolled broken pediment entablature. Directly over the front door is a Palladian style window.

17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

The church building has a steeply pitched gable roof with an adjoining bell tower. The building is entirely constructed from cut granite and features arched, pointed gothic stained glass windows and a small rosette stained glass window on the front gable. The entrance has two large wooden doors within a small gable alcove. The adjoining bell tower has a similar entrance. The bell tower is quite massive constructed of granite supported by buttresses. The tower has arched stained glass windows and louvered wooden belfry vents. The tower has a battlement top.

17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This gable roofed house has a steeply pitched roof with wide overhang all around. It has fully pedimented gables with elaborate stick style motifs. The center portion of the house extends slightly over the porch and has a bracketed eave. This center portion has a flat red roof which meets a smaller gable dormer with gothic arched and rosette windows. The porch has a shed roof with a gabled center portion supported by square chamfered posts with brackets.

IGNIFICANCE
Architect: ____________________ Builder: ____________________

18. HISTORICAL OR ARCHITECTURAL IMPORTANCE:

This is a copy of a house the minister saw in England.

The porch balustrade has an intricate clover leaf sawn pattern and a side porch has similar detailing. There are two brick chimneys indicating a centerhall plan.

7. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This five bay colonial has two massive brick chimneys at each end. The house has a slight gable roof overhang with return cornices and there is a slight overhang between the first, second and third floors. The front door has a hip roof type porch supported by large square columns. The rear ell has a gambrel roof and ballroom.

8. SIGNIFICANCE

Architect: Builder: Humphrey Pratt

8. HISTORICAL OR ARCHITECTURAL IMPORTANCE:

For many years the tavern was a stage stop on the run between New Haven and Boston. It was also Saybrook’s first Post Office. It has many notable architectural features including a ballroom in the ell which has a spring floor to facilitate dancing.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This Church building has a steeply pitched gable roof, with beautiful stained glass windows facing the road. The building has large double entry wooden doors recessed within a Gothic arch. The stained glass window facade as well is recessed within a larger Gothic arch also enveloping the door. The brick exterior follows the tall gable roof form and is supported by brick buttresses. The sides of the building have paired Gothic stained glass windows including the side wing.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This building has a hip roof form with a gable projection on front flush with the main facade. The roof has a small overhang all around with several other gable dormers. The windows have modest trim and the double entry paneled doors have large window lights flanked by half round columns on paneled pedestals which support a broken pediment cornice surrounding an entablature inscribed with "Acton Library, 1873". The stair balustrades have turned posts.

IGNIFICANCE
Architect:                                      Builder: 

18. HISTORICAL OR ARCHITECTURAL IMPORTANCE:

The old Acton Library was built and first occupied in 1873 on land which was deeded to the trustees of the Acton Library Association by Mr. Thomas Acton. The Library was an outgrowth of the earlier "Ladies Circulating Library." In 1904 the Library became free to the inhabitants of the town.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This Colonial is unusual in that it has a three bay facade instead of five bay. It has a modest roof overhang with dentil blocks all around. There is a fine Palladian window over the center door. The paneled door is flanked by sidelights with a wide semi-elliptical fanlight over the door. A broad gable porch over the four is supported by round columns. The gable ends also have semi-elliptical attic windows.

7. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This Victorian has a three bay gable facade facing the road with wide roof overhang all around. It has characteristic Victorian roof overhang at the eaves (without boxed cornices). The house features two pointed attic windows with matching shutters. There is a flat roofed porch on front supported by square chambered posts with delicate brackets and the porch has a square post balustrade. A round headed stairwell window, typical of many Victorian homes, has a divided light border.

OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This building has a three bay facade facing the road with wide roof overhang all around and without boxed cornices. The building features a gable roofed center projection encasing the front door. It has a wide roof overhang and wide frieze and the windows feature gable cornices with delicate "loop" pattern sawn trim. The other windows and the door have shed type cornices supported by small brackets. The house has two eyebrow type windows under the front eave.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This building has a three bay fully pedimented gable facade facing the road with paneled corner pilasters and identical pilasters between the window bays. The entablature is lined with curved dentil blocks including the entire pediment. The first story windows are round headed with paneled bases and keystone motifs. The door has a fanlight window over it and the building features a large gable attic fanlight window.

The building was originally used as a carpenter shop for the building at the church. The second floor was added around 1915 when the building was moved.

    ___ open land ___ woodland X residential ___ scattered buildings visible from site
    ___ commercial ___ industrial ___ rural ___ high building density
16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
    This building sits very close to the road with a decorative iron fence in front.
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This building has a very wide exaggerated roof overhang without boxed cornices at the eaves. There is a bay window projection on the ground floor with a smaller bay window directly over it. The front door has a corner location with a large rectangular window transom over it. There is a flat roofed porch over the entry supported by square posts.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS: __________
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This Victorian has a wide roof overhang all around, without boxed cornices. The house has a very elaborate stick style motif on the front gable of very intricate design. The entire second floor has board and batten siding over a boarder of imbricated shingles and clapboard siding on the first floor. There is a very ornate shed roofed front porch supported by square posts with brackets.

16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

This five bay Colonial has a massive brick central chimney and a very slight roof overhang all around. Originally 12 rooms, this house is obviously a product of commercial development. The house has post and beam framing with 2" plank construction. The front door is flanked by side-lights and wide pilasters. A porch along the front of the house is obviously a later addition, with wide roof overhang, supported by square columns.

This house was constructed in three parts, the first part a log cabin in 1690, a Dutch gambrel in 1750, and a Federal styled half house in 1802. Col Elisha Still built the half house as a wedding present for his son. The half house has a three bay facade with classic entablature lined with modillions. The front door is flanked by wide pilasters and has a gable roofed porch supported by round tapered columns. The door has a fanlight window overhead and the porch has modillions.
